Registration and Login Procedure
If you do not have a HIVE account, you first need to create one at hive.niu.edu.

Complete all of the user registration fields.
A viewer client is required to access the HIVE. The Imprudence viewer is available from kokuaviewer.org. Choose the version that is compatible with your operating system.

Once you have installed the viewer, you need to add the NIU HIVE server to the Grid Manager. Begin by clicking on the ‘Grid Manager’ button.

Then press the ‘Get Grid Info’ button and the rest of the required form fields will be loaded. The Grid name should be ‘hive’. When you are done, press ‘Apply’ and ‘OK’ to close the window.
Now select ‘hive’ from the Grid menu. Enter your first name and last name, along with your password. If it is your first time entering the HIVE, set your start location to ‘Glidden Campus’. If you are returning to the HIVE, you may leave the start location as ‘My last Location’. Press the ‘Log In’ button and you should arrive in the HIVE shortly.
